

# It's not just your vision we care about - it's your health too

OCT Screening is a brand new service we are offering...

We have invested in the very latest technology and can now study your eyes with incredible detail allowing early detection, diagnosis and monitoring of many conditions...

We are offering  
a brand new  
service

# Your eyes are quite extra-ordinary...

We have installed the remarkable Nidek Optical Coherence Tomographer...

- We are able to image the very back of your eye
- Study your eyes in incredible detail
- We can see from the top surface of your Retina right down to the underlying surfaces
- Keep records of the images to compare them the next time you visit

**We are offering  
a brand new  
service**

# What is an OCT?

Optical Coherence Tomography...

It allows early detection, diagnosis and monitoring of Glaucoma, Diabetic Retinopathy, Age Related Macular Degeneration, Retinal detachments and much more...

**We are offering  
a brand new  
service**

# What is an OCT?

Optical Coherence Tomography...

- Instrument that allows us to see beneath the surface of the back of your eye (Retina)
- Allows us to detect any signs of problem or disease
- Very advanced technology to detect abnormalities at an incredibly early stage
- Found in most hospital eye departments
- Very detailed results obtained

**We are offering  
a brand new  
service**

# Why should I have an OCT Screening?

- In combination with your normal eye test will allow us to obtain the most detailed information about your overall health
- Early detection will lead to timely treatment and better outcomes for the health of your eye

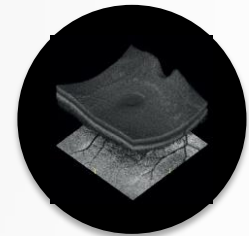

## **Does it hurt?**

No. It is quick and painless (nothing touches your eye at all). It is just like having a photograph taken and takes about 1 or 2 seconds.

We are offering  
a brand new  
service

# What happens to my images afterwards?

Your images will be stored on file, so when it comes to your next appointment, if you want another screening we can compare your images.
